

How else do you see technology being useful to you in school?	Which technology would you like to use in school? Why?
<p>You could use it for a project, for example you have to do a project for science, so you use your laptop for reaserch.</p>	<p>i would like to use this technolegy in computer because you always have to do projects in computer and you always have to use computers in this class too.</p>
<p>You could put your books on an ipad. You can use weblockers email or renweb and your teacher can give you assignments anytime on the computer and you can get started on them in class or use it for classwork.</p>	<p>an ipad so i could put my books on it instead of carrying around big, heavy textbooks.</p> <p>lpad you can read on it and solve problems and search the web and kindle fire to read with and search the web.</p>
<p>You can learn about different stuff to help you in classes.</p>	<p>I would like to use a computer because you can you use it for so many things</p>
<p>You can explore and make sure you get what you have done right</p>	<p>I would like to use ipods, ipads, and iphones so we can have our textbooks on them</p> <p>Portable laptops and phones. You can go on microsoft word, other programs, and check your emails and texts from your parents and teachers</p>
<p>You can email your parents and teachers. You can do work on the computer and it helps you learn. We usally whose technology for work in computer than for fun. We use Word and powerpoint on our work. We go to free typing game .net to help us with our typing. We also use it to take AR tests and Google tests like this one.</p>	<p>I would like to use IPads at our school because we should be able to have our school work and homework!</p>
<p>Yes it helps me be able to research better and more clearly.</p>	<p>I'd like them to let us play more games, because it makes learning that much more fun.</p>
<p>x</p>	<p>on an ipad</p>
<p>x</p>	<p>x</p>
<p>When you write essays you can do it on the computer.</p>	<p>None because we have all the things we need.</p>
<p>When you write a essay or a reserch paper, you don't have to write it.</p>	<p>I would like to you's the kindle fire, because I can read</p>
<p>when you need to look something up for homework or a test.</p>	<p>computer because the computer can help you look stuff up and find information to solve the question. i would like to use laptops like jpll for all our work+ the benifit to teachers is</p> <ol style="list-style-type: none"> 1.its always neat 2.we get better at typing
<p>when you are using the smartboards in class its alot easier</p>	
<p>When there is an algebra problem that needs more information.</p>	<p>I would use my iPhone in school because it can help and do almost everything educational related.</p>

When teachers send important e-mails about tests or assignments, when I take AR tests, when I need to do research for an assignment, and when I have spare time.

when teachers do not know an answer and they use the computer

when I need help on a math problem, I usually use a calculator. But always I use a calculator on my iPhone 4s or my iPad or my iTouch. I can look up the answers, but I never do that, it's cheating. You need to do stuff your self sometimes. But when the problem is to complicated, you can probably use some technology.

When I get to take AR tests

When I get into Highschool and college I will know what to do and how to use technology well....it helps us in school to um like use the smart board and computer to help us study, take notes, and learn.

We would not have to use paper and we will be able to finish whatever it is quicker.

we watch videos to learn, play music sometimes, and do computer class.

we have smartboards to help teach us subjects.

We don't use technology at our school. We only use computers.

We can watch videos and copy notes from the smart board almost every day at school

We can learn new using the internet instead of textbooks which is an advantage.

We can learn how to type and we can also learn how to use computers.
very useful because we are going to need it when we get older.

I would like to use laptop computers so that we have all of our assignments saved there. It would also be a lighter load to carry from class to class and I would get to class faster.

tablets, iPads, Galaxy Tabs. So we do not have to carry all our books

I would like to use an iPhone 4s in school because you can ask Siri (the iPhone person who answers all your questions and sometimes text people when you don't want to text them. All you have to do is ask Siri.) how to do stuff and search the internet. Look at pictures and text (well, not in school) read the news, look at magazines, read books etc!!!

Computers, I know how to work with them well

smart board because it makes learning fun and easy.

iPad because they are very useful and can help us when it comes to all subjects.

I would like to use an iTouch/iPhone, Kindle Fire, and a Mac because they are fun to play with, do games, and text. Also because I like to do that instead of school.

iPhones because they can help you with math.
I would like either iPads with a stylus/pen to write on them when we take notes because I want all of our text books and spirals on them because it would be lighter to carry around from class to class and easier and cooler or I would want a Mac Book Air with all of our text books and spirals on them because it would be easier to do everything same with the iPad and a lighter load to carry around to all of our classes it would also be cool if you could bring your Kindle Fire to school

I think that we could use iPads in our school but we are so blessed to have computers at all.

I would like to use any type of technology in school, iPad, iTouch, etc. Because they could be used to make a typing assignment instead of waiting for computer time, we could already do it.

iPad because it's easy to find things and you can download things easy. You can also use the app pages it's very useful.

To write papers.

laptops,because they are easier to use

to type papers and making posters.

I personally like windows 7 very much.

To try and find research on projects in school.

I would like to bring a computer to school because we trust our own computer.

To help find research that will help the school.

Computer, because it helps us with our homework and as a reward.

to check your work like a calculator

I wish St. Rita Catholic School would give high-grade students that are willing to pay a little extra each year a tablet. It could be an iPad, Samsung Galaxy Tab, etc. Jesuit has begun giving students iPads for an additional \$600.00. If you buy an iPad they will buy your books for you. You can also buy the same textbooks on apple devices.

Technology helps me find solutions to many problems. Also, online you can make a website to help the school's cause.

Technology helps a lot in school with research and projects.

I would like iPads to be allowed because I only have an iPad as an e-reader nothing else.

Technology can teach kids to do things on their own. It helps with homework, personal, or just to have fun.

I would like to go on all Microsoft programs such as Microsoft Access, Powerpoints, Excel, Publisher, and so much more.

Technology can be useful for all subjects basically

I would like to be able to use my iPhone in school because it will help my grades and using any type of electronic can make you smarter in a way. Kindles because you just type the book you want and you can have the book you want to read and the school might not have that book.

taking AR tests

Kindles because you just type the book you want and you can have the book you want to read and the school might not have that book.

taking AR tests

Students can do things faster and have the whole internet for help. Also I know a way you can block out playing apps. Our parents can make a password and turn it off once we get home.

Kindle Fires because you can read books and newspapers. You can turn off games. You have the internet as help and you can block out bad sites.

SRS News

An iPad because you can have books on the iPad

Sometimes for a class, Strive. And for daily announcements.

I would like to use a cell phone, iPad, or Kindle Fire.

So we can research for classes. We can do our homework. Learn to use the computer so we can know how to use it when we get one in our life.

A computer because we always run out of notebooks and we have to ask our teacher and we have to go out to the store and buy one for \$3.00 and we can have fun at school.

so if you don't know something you are interested in you can look it up on a device and find out about it.

so i can do research or use help or even mess around with powerpoint, word and excel!

Smartboard!!!!

see below

Searching something I have a question on or I am interested in.

Nothing I can think of.

Normally when we take notes for a Smart Board.

My class goes on the computer like every day.

Mrs Caballero types her notes on a computer and we copy them

Like in a computer class.
Kindles would be helpful because you can buy or try samples of research books for Science and Social Studies

It's useful because you can go to the internet and search something like a research paper.

It would be useful to research.

It teaches us solutions to problems we may later have.

It helps you when you need to look up a definition of a word.

It helps us learn.

It helps understand more about technology.

I would like itouches and phones at are school because you can look up things and make if you had free time we could play games on them or text or anything else.

microsoft publisher, because my brother told me about it that you can make thank you cards or stuff like that!

i touch!!!!!!

An iPad sort of thing that puts all of your textbooks and notes on it because then I would not have to stumble and fall over because of the weight of the books!!! (seems like we need those)

I would love to use the Nook Color in school.

computers because, you mostly use them for things like e-mail, research, and essays for class projects.

Mac laptops. Because it wouldn't take so long to take turns using the computers on free days and research.

I would like to use iPads at school. I think touch on the computer is cooler than using a mouse.
iPods, because in movies I see people with headphones. I think you should be able to listen while you work

iPad because it is very educational
I would like to use Kindles because they allow you to read without having to go out to a book store and buy a book.

The iPad because it is a really good operation.

To research.

I am not sure.
Phone and iPad because if an emergency you can call you mom, dad, etc. The iPad helps you take notes and look up different things when needed.

The internet because it has so much information.
I would like to use iPads because it has internet use (with WiFi or phone company). It has fundamental games for the learners use.

It helps people learn in all different ways. It is also a much easier way to learn things.

It helps me look up information for essays, presentations, poems, and other work.

I think it is very useful.

In computer it helps us learn and we also need them to take AR tests

In computer class.

If I forget to purchase a book for school, I can just use my Kindle.

I will like to use iPad2 or a laptop or any touch thing.

I use technology for my reading tests or AR

I use Microsoft PowerPoint for my own use of it

I think you've mentioned so much that I can't remember a single other source of technology except for my DS. Or clock.

I think we have enough technology, or in other words I don't know.

I think that the survey has covered it all. Maybe TVs for educational videos or just for a reward

I think that our school could use the internet more
I think that kids should be able to try to do tasks on their own and I think we should be able to teach stuff to ourselves and use the technology we know and learn a bit of technology too. Also using tablets in class to search the internet and read. If this could happen all the kids would get education and learn new things in all subjects every day.

I think it's useful because I can learn a lot of stuff and get tons of helpful information to use for my projects, papers, and homework.

I would like to use an iPad because you can use it anywhere and it is a portable device. iPads would be great to use because they are much easier to transfer than a computer.

I think I like all the technologies at school.

Computers to speed up learning

I would like to use the iPad. I think it is the utensil for studying, homework, and presentations.

As I mentioned above, I would hope to use my Kindle occasionally.

I will like to use iPad2 or a laptop or any touch thing because it might be fun or easy

I would like to use a computer more because we could type our work

I would like to use iPads because I don't like lugging around all of the textbooks

A computer because you can go wild with information!

I like that we can use the e-readers, I don't know anything new.

I would like to use iPads for textbooks and other books because some of the textbooks we carry are very heavy and we tend to drop them.

I would like to use any technology as long as the kids get good education and lots of skills in all the subjects. I think it is a good idea because when kids get older they will be able to teach their children.

I would like to use my iPod because I would not have to bother my teacher or go all the way down to the computer lab to ask one silly question. I would also like to use a Kindle or Nook so I wouldn't have to lug my book everywhere and I could read more.

I think everybody should use lap tops to help the enviroment

i see technology being usefull to me when i type some essays that you have to have writtin a certin number of ords on

I see technology being usefull in my school when we read information or watch educational videos on the Smart-Board

I see technology being useful to my school by if we have projects in class, and we need the computer, the teachers have computers in there classrooms.

I see technology being useful to me in school when I am in Robotics/Strive.

I see technology being useful in school when we look at research in Reading, Science, Social Studies, and Math.

I see technology being useful in school when we have to look up or research something. Maybe even take a test, find a picture, or do a project/research paper.

lap top, e-mail

i wish my school had ipads so we could have our books on the divice becuse some times there is so much stuff to carry we carry it out front

In school I'd like to use ipads because I think They're easier to use than computers

I would like to use the one we use now because if we change then we kids would have to "learn" how to work the new technology.

I would like it when we have free time, we can play on whatever website we'd want (example: Monsterhigh.com)

The technology I would like to use in school are iphone and ipad.

I really am not preferable on technology but if i had to choose probably Dell. I would use Dell because it is a main computer/technology type resource for me. I use it a lot too and i am used to it. We use it at school too so we know what to do and aren't exactly confused about

anything.

I see technology being useful in class because we learn how to do things on a computer. We take computer class, so that helps us learn more about how to work in word, powerpoint, & excel. We also learn how to work & find things on the internet. I see technology being useful because without technology are school wouldn't be able to have announcements. Also sometimes we have to write an essay, then we have to type it so without it i don't what we would do.

I see technology being useful because books sometimes bore kids but when you use technology everyone will have interest and just want to learn more. I see technology being used at school by using computers for ARTests or research for a paper, microwaves to heat lunches, and the elevators by seventh and eighth graders to go from the first floor to the second floor.

I see technology being useful in school by using I-pads to ask your teachers questions at home

I see it useful in my school because i learn new stuff

i see it as checking renweb, homework, checking and working out problems and notes.

I see essays being typed.

I find it useful for our school to not block websites for free day

I dont usually use technology for school that much.

I do not see technology to be useful in school at all.

helping us with comuters

going online and take practice quizzes

I would like to use an ipad in school. I say this because on an ipad, you can get the kindle app & buy text books. This way we wouldn't have to carry so many text books, which can be bad for our backs. An ipad would be the perfect technology to have in school. I think that we should have some sort of ipad or kindle or something to the sort because the amount of books we have to hold is horrible, we atleast have to hold 5 pounds of books including text books and workbokks and spirals.

I think schools should have Ipads. Ipads have caculators, apps, and games that help kids learn better. There is an app called solor walk and I used it for my solar system test and got a 100%!

At school I want to use the microwaves to heat up my lunches.

I would like to use I-pads in school because you could search the internet about an assignment ,or read books and the teachers could send messages to you about upcoming assignments or about jeans day ,and things like that

Ipad like ereader

I would like to use a Ipad to take notes, and for all the heavy textbooks that we can buy on the ipad. Plus so we dont have to buy lose leef or a pencil sharpener or a pencil. The ipads should only be for 5th 6th 7th 8th graders.

An iPad because they are fun and you can get the internet.

Kindle fire because I have one and you can read on it. I would like to use ipads instead of carrying soo many books. But i dont really care if we dont. I would like to use the internet more for prodjects.

I would like to use phones that you could set on vibrate so if you forget something at home, you could call or e-mail your mom or dad so they could bring it for you.

i pad they are amazing

ipad because you can search the web, read, adn google things

for text books and e readers

For taking ar test and getting point and computer class.

For taking a math,english tests ex.

for research.

for research and papers

For homrwork if I don't know what to do.

for homework

for games
e-mail
texting
blogging
chatting

Doing assignments on the computer and projects on the computer.
Broadcasting is really slow. We only use computers in computer class.
Not very succesful.

bringing kindle fires for reading

being able to use microsoft in stead of making things and writing tem out

Because you can reasearch stuff

because it whould help us learn different things to study and work

Computers because you can do any thing for school pretty much

I would like to use apple and mac because thats what i use at home and i know how to use apple and mac better than others but i also know how to use dell good.

I would like to be able to use Google.

a tablet and phone, so we can play games on the way to classes.

research so i get a better grade

To search for homework ,play games

apple stuff to play games

a laptop
a tablet
a thumbdrive
phone because if it was an emergancy or if something bad hapened you would be able to just take out your phone and call your mom or dad or someone close to you as in related.

I would like to have textbooks in a tablet, because it is such an abuse of books that we have to carry around all day. And you can hightlight things. Maybe I pads will do the job or anither tablet.
kindle fire because you cant do anyhting on it without wifi and we cannot use the schools wifi and becasuse we would just read not play games. that is why we sign the slips

ipad, iphone, itouch... because it is fun

because I can use it well

Ipad, Iphone, apple products, and mac books

Assignments

Tablets to browse the internet instead standing up to go on a computer

?

?

different newer computers because they are faster and easier to use

I would like to use iPads in school so I could use it to read and find information, like I do at home.
